

**California Forensic Evaluation Proposal
SACRAMENTO CALIFORNIA**

Prepared for: Courtney Bailey

Purpose

This forensic audit will test the integrity and accuracy of Dominion Voting System for the 2020 election in Sacramento County, California.

Proposed Scope of Work

- Forensic Duplication and Examination of:
 - Election Management Server running Dominion Democracy Suite.
 - Compact Flash cards used by the local precincts in their Dominion.
 - USB memory sticks used by the Dominion VAT (Voter Assist Terminals).
 - USB memory sticks used for the Poll Book.
- Re-tally memory cards (electronic ballots) on a certified tabulator using a certified clean USB tabulation software version and compare with election-day tally.
- Re-create memory cards from the ImageCast Scanner backup memory and re-tally on a certified tabulator using a certified clean USB tabulation software version and compare with election-day tally.
- Re-create memory cards from the ImageCast DRE backup memory and re-tally on a certified tabulator using a certified clean USB tabulation software version and compare with election-day tally.
- Re-tabulate statistical sample of legal paper ballots.

Deliverable

- Election System Forensics Report
